Sequencing Report

Raw data delivery and Bioinformatics

Analysis date: 2016-10-28
Investigator: Jennie Finnman
Project: G16-032

Sequencing Report

Contents

Publications are important to us, as are our users. Publications are signs that our work generates interesting results. This enables us to apply for more funds to keep the centre running. We would appreciate if our facility is mentioned in the Acknowledgements section when data have been obtained in our lab, for example by using the sentence: "We would like to thank the Genomics and Bioinformatics Core Facility platforms, at the Sahlgrenska Academy, University of Gothenburg".
