Sequencing Report

Raw data delivery and Bioinformatics

Analysis date: 2016-11-09
Investigator: Jennie Finnman
Project: G16-034_Kerryn_Trusg_stranded_totalRNA

Sequencing Report

Contents

Contents	2
Sequencing run information	2
General run information	2
QC plot and statistics	3
Sample information	4
Data information	5
Data delivery	5
Data structure	5

Run ID	RunIDxxx
Date	RunIDxxx
Instrument	Nextseq
Read length	2x76
Reagent kit version	placeholder1
Application	placeholder2
Library preperation kit	placeholder3
Protocol	placeholder4

Publications are important to us, as are our users. Publications are signs that our work generates interesting results. This enables us to apply for more funds to keep the centre running. We would appreciate if our facility is mentioned in the Acknowledgements section when data have been obtained in our lab, for example by using the sentence: "We would like to thank the Genomics and Bioinformatics Core Facility platforms, at the Sahlgrenska Academy, University of Gothenburg".
